## About me

An adept undergraduate with a commendable academic history and substantial experience is currently taking a degree on Bachelor of Software Engineering at the Informatic Institute of Technology accredited by the University of Westminster.

## Skills

- Programming Languages: Java, Python, Java Script, PHP
- Libraries / Frameworks: ReactJS, Flask, Bootstrap
- Web Development: HTML, CSS, SCSS
- Databases: MySQL

## Education

**Informatic Institute of Technology** Sri Lanka

Reading BEng (Hons) Software Engineering 2023-2026

1st Year Module

6 Modules 120 credits at level 4:

Passed 6 Modules

- Mathematics for Computing
- Software Development I (Python)
- Trends in Computer Science
- Computer Science Fundamentals
- Software Development II (Java)
- Web Design and Development

2nd Year Modules (Ongoing)

- Object Oriented Programming – 74 %
- Database System – 65 %
- Software Development Group Project - ongoing
- Software Engineering Principles and Practice – 53 %
- Algorithms: Theory, Design, and Implementation(ongoing)
- Server-Side Engineering - ongoing

## Projects

- **Automated Report Format Checker** *Python, ReactJS, Firebase, GCP*

Our second-year project involves developing a web application aimed at detecting formatting errors and retrieving Google Docs usage history using the Google Cloud Platform API. Leveraging a Python-based JSON rule system, we ensure accurate and efficient validation of formatting errors.

- **Pdf to Document Convertor & YouTube Downloader | *Link*** *HTML,CSS,JavsScript,Python(Flask)*
  Self-initiated web project: PDF to Word converter & YouTube downloader. Proficient in HTML, CSS, JavaScript, and Python (Flask)

- **Online Shopping Management System** *Java, Java Swing*
  Developed a comprehensive Shopping Center System using advanced OOP principles, with a Java Swing-based UI entirely coded from scratch.

- **Food Queue Management System** *Java*
  Implemented a Food Queue Management System for a university project using Java, incorporating array and Array List for efficient queue handling**.**

- **New Year Countdown WebApp | *Link*** *HTML, CSS, Java Script*
  Created a New Year Countdown WebApp during my free time. Used HTML, CSS, and JavaScript for frontend and backend countdown features.

- **Sport Network Website** *HTML, CSS, Java Script*
  Collaborative effort in a first-year university group project. Developed a Sports Network Website using HTML, CSS, and JavaScript.

- **Mark Prediction Software | *Link*** *Python*
  Developed a software tool in Python for predicting student grades and providing them with insights into their academic performance.

## **E**xtra **C**urriculum

- Volunteering at Sasnaka Sansadaya
- Prefect of H/Debarawewa Junior School

## **S**oft **S**kill
