Profile Summary

A motivated final-year undergraduate with a strong foundation in backend development (Java, Spring Boot), DevOps, and cloud technologies. Experienced in managing group projects and contributing as a backend developer in university settings. Adept at problem-solving and logical thinking, with proven teamwork and collaboration skills. Actively participated in volunteering activities, demonstrating leadership, community engagement, and a commitment to social impact. Passionate about leveraging technical expertise, project management abilities, and teamwork to deliver efficient solutions.

Core competencies

- Java, python, php, GO
- Spring boot, Laravel, MERN
- MySQL, MongoDB, Postgresql
- Microservice , MVC
- REST APIs
- Docker, Kubernetes
- Jenkins, Github action
- GIT, GIT LAB
- Argo cd
- Trivy, Sonarqube
- AWS
- Kafka
- Promethues, Garafana
- Firebase
- Terraform
- Flutter
- Linux
- Shell Scripting

Projects

Boardgame Corp Pipeline (CI/CD Automation)

Developed and managed a robust CI/CD pipeline using Jenkins, Maven, SonarQube, and Docker, automating the build, testing (including unit tests and vulnerability scanning with Trivy), and deployment of applications to Kubernetes. Implemented code quality checks using SonarQube and ensured secure deployments through KubeAudit scans, streamlining the software development lifecycle from code commit to production release.

Moviehub-devsecops-cicd

Implemented a DevSecOps pipeline with automated testing, security scans, and Dockerization. Used GitHub, ArgoCD, and Kubernetes for CI/CD, ensuring secure and efficient deployments.

CorpFlow CI/CD Pipeline

Implemented an automated CI/CD pipeline for a corporate application, leveraging GitHub, Jenkins, Maven, SonarQube, Aqua Trivy, Docker, ArgoCD, and Kubernetes to optimize build, test, quality assurance, and deployment workflows, with manifest updates via a dedicated repo.

Ecommerec cloud-native

Designed and implemented a scalable e-commerce platform using Spring Boot, Kafka, and Kubernetes. Built microservices for order, product, inventory, and notifications with MongoDB and MySQL, ensuring resilience with Resilience4J and service discovery via Eureka. Integrated API Gateway for secure routing and enabled monitoring with Prometheus, Grafana. Deployed using Docker and Kubernetes for high availability..

Student Clearance Management System

Developed a **real-time** Student Clearance Management System using Laravel, MySQL, and Blade. Enables students to **request clearance**, while departments can approve or reject requests with status tracking. Ensures a streamlined and efficient clearance process for the university.

Lego

Developed a Flutter and Firebase-based system to streamline bus tracking, seat reservations, passenger management, and real-time notifications **at** KDU Southern Campus (KDUSC), Sri Lanka. Features include live bus tracking, journey status updates, admin-controlled records, and push notifications for seamless transport management

BookSphere

Built separate CI/CD pipelines for the backend (Spring Boot 3, Spring Security 6) and frontend (Angular, Bootstrap) of the Book Social Network app, enabling user registration, email validation, JWT authentication, book management, borrowing/returning with checks, and return approvals; deployed on AWS lightsail with WebSocket for real-time feature

Education

BSc (Hons) in Information Technology 2021 |Present
General Sir John Kotelawala Defence University, Sri Lanka

Certification

AWS Knowledge: Architecting

Oracle Cloud Infrastructure 2024 Certified Foundations Associate

Oracle Cloud Infrastructure 2024 Certified AI Foundations Associate

GitHub Foundations

Publication

Transforming Banking with Data Lakehouse Architecture: Overcoming Integration Challenges to Enhance Analytics and Decision-Making(IR@KDU)

Reviewed Data Lakehouse impact in banking (2015–2024) via IEEE Xplore, SpringerLink, and others, showing 30% faster analytics, 25% better governance, and 20% cost reduction, enabling real-time decisions and improved risk assessment; recommended further case studies.
