As a software engineer with 3 years of experience, I aim to utilize my expertise in Web and mobile app development to create innovative and user-centric applications. With a passion for delivering seamless user experiences, I seek opportunities to contribute to cutting-edge projects, fostering growth and pushing the boundaries of mobile and web technology.

Experience

Full Stack Developer
H-Town Technologies Inc | India (Remote) | 2022 August - present

- Using best Troubleshoot and debugging techniques find out application drawback, fixed in ReactJs application and enhance performance by 200%.
- Converted wireframes UI/UX design into application responsive UI, implement system features using best coding standards and verify the features using unit testing, UI responsive testing
- Implemented the push notification with Firebase, In-app update service for all users that increases real-time communication and user engagement by 200%.
- Use Grafana observation tools to analyze the real-time performance metrics, errors, logs, and exceptions of the ReactJS web application. This optimization initiative aims to boost user performance by 100%.

Associate Software Engineer
Fcode Labs | Colombo, Sri Lanka | 2021 August – 2022 May

- Design Restful API request, response based on requirements in JSON format and update project swagger document and given better API design which helps to improve frontend efficiency by 100%.
- Resolved issues, implemented new functions in mobile apps and updated to latest Flutter version improve the performance by 150% in all platforms.
- Used OOP, Factory, Singleton and Bloc state management tools to develop Flutter app gain performance by 100% and got the management satisfaction.
- Implemented project Node.js backend application using MVC architecture, Solid design patterns, deployed to Google cloud platform's Cloud run and save developer code reading time by 100%.

Intern Software Engineer
Fcode Labs | Colombo, Sri Lanka | 2021 Feb – 2021 July

- During my internship, I gained valuable experience in mobile app development and collaborating effectively within an IT team.
- Contributed to project discussions, offering insights for future development.
- Developed and maintained mobile apps, fixing issues, adding features, and ensuring optimal performance using Flutter and Firebase.

Education

BEng (hons) in Software Engineering (First Class | Top-up)
London Metropolitan University – Esoft Metro Campus | Colombo, Sri Lanka | 2022 Sep – 2023 Sep

Graduate Diploma of Software Engineering
IJSE - Institute of Software Engineering | Colombo, Sri Lanka | 2019 Sep – 2022 Feb

Skills

- TypeScript, JavaScript, ReactJS, NodeJS, Flutter, HTML, CSS, .Net, C#
- Firebase, MySQL, MongoDB, Google Cloud Platform, GitHub, Bitbucket

Projects

- **Employee Management System:** An efficient system that aids company management in overseeing their employee database.
  Source code: https://github.com/Daham2000/ems-fe-com
  Technologies: **ReactJS, NodeJS, Google Cloud Platform**

- **Travelers app:** An application designed to assist visitors in discovering their preferred destinations.
  Source code: Github repo Backend, Github repo Frontend
  Technologies: **Flutter, Dart, Flask Python**

Languages

- English (Professional working proficiency)
- Sinhala (Native)
