Projects

EduLabs: Student Management System

2023 - 2022

EduLabs' is a student management system that allows the users to use features such as online classes fee payment, self-enrollment, record attendance, issue touts, change timetables, and other unique features to help an educational institute operate smoothly. My contribution is to create notification handling, tutorial handling, and timetable handling.

- Role: Full-Stack Developer
- Technologies: Angular, Spring Boot, MYSQL

E Commerce Platform

2023

The e-commerce platform is a website for online shopping. I have created operations for adding, updating, deleting, and saving items.

Projects

Cafe Management System

2023- Present

At present, I'm working on a cafe management system utilizing MSSQL and Angular and Spring Boot. I would like to add a user-friendly interface to the cart item system, purchases system, add, delete, and edit item.

- Role: Full-Stack Developer

Pest pulgger

2022 - 2021

This is our hardware project. This project was created to focus on insects. The solar panel system powers the battery, and the battery itself is operational. Eco-friendly products were created.

- Role: IoT Stack Developer
- Technologies: C language, Atmel Studio, Proteus Simulations

EXTRACURRICULAR ACTIVITIES

- Club Treasurer of Leo club of university of Moratuwa (23/24)
- Assistant Treasurer of Leo club of university of Moratuwa (22/23)
- Passed the basic first aid exam on the Sri Lanka red cross society
