KANISHKA MALLAWAARACHCHI

Software Engineer

mallawarachchikanishka@gmail.com | +94 77 5866316

I possess a strong inclination for creative coding, channeling my creativity through writing code in innovative ways. My passion lies in the field of software engineering, where I strive to be versatile and maintain a high level of professionalism. When faced with a problem, I approach it with the focused determination to find solutions. This process is deeply satisfying and gratifying to me.

Tech Stack

Tech	Skill level
Java	Proficient
C#	Novice
Swift	Trainee
JavaFX	Proficient
React	Novice
JavaScript	Novice
Spring Boot	Novice
.Net	Trainee
Flutter	Novice
Firebase	Novice
MySQL	Proficient
Oracle	Proficient
Subversion	Proficient
GitHub	Proficient
Ireport	Proficient

Work Experience

Richard Pieris and Company PLC **2022 - Now**
Software Engineer

- Revamp company point of sale system(POS) for touch computers and enhance UI and fine tune code based on identified bug, which helps to increase user productivity.
- Integrated an android credit card reader machine with POS system.
- Developed price revision module for the POS system which help to significantly reduce item refunds and supervisor involvement.
- Integrated third party payment method with POS system while coordinating with bank.
- Developed supplier mapping module in ERP for inventory distribution throughout outlets which helps to distribute inventory effectively.

Richard Pieris and Company PLC **2020 - 2022**
Associate Software Engineer

- Developed promotion module in POS system
  Ex – Max discount promotions, Non privilege customer promotion, Gift voucher promotion.
- Develop modules in payroll system like attendance bonus for employees based on pre define criteria's.
- Develop module for payroll system for new recruited employees for the first month salary process.
- Created complex reports using MySQL and Oracle and plug to ERP system.

Academic Qualifications

- MSc in Advance Software Engineering **2023 - 2024**
  University of Westminster UK (IIT)

- Bachelor in Information Technology **2017 - 2022**
  University of Colombo School of Computing

Interest

- Do workout and maintain good physique
- Interest to play PC games and play brain games like Sudoku
- Make mind comfortable when travel and explore new things

Projects Involved

Point of Sales(POS) Revamp
Migrate legacy POS system to upgraded java version and resolve identified bugs also enhance the UI for Touch Screens.
Tools – Core Java, Javafx, Swing, MySQL, NetBeans

Online Orders
Develop an online order placement service to customer during Corvid period. User can select outlet, place items and provide delivery information.
Tools – Spring Boot, Oracle, MySQL, STS, Postman

Fitness Application
Develop a fitness application which record user data, daily activates and calorie intake. Also provide data for selected date.
Tools – C#, .Net, MS SQL, Microservices, Visual Studio, Postman
https://github.com/kanishka-dot/FitnessAppWebApi.git

Asset Management System
Develop asset management system to record assets, transfer assets, maintain supplier and item, maintain user account, different user roles and permission.
Tools – Java, Spring boot, React, MySQL, VS Code, STS, Postman
https://github.com/kanishka-dot/asset-management-backend.git

Mobile Payment API
Develop API to update 3rd party Mobile payments in Oracle database and synchronize with 3rd party API gateway.
Tools – Spring Boot, Oracle, STS, Postman

Develop Inventory mapping module for suppliers
Develop module in ERP where supplier order delivery mapped based on user provided parameters for multiple warehouses and outlets.
Tools- Core Java, Swing, Oracle, MySQL

Expense Tracker
Develop expense tracker mobile app for IOS. App provide functionality of register user, login, add expenses and income, create categories and view reports.
Tools- SwiftUI, Firebase

Social Media Mobile App
Develop Social media app for android devices. In this app user have separate login, send friend request and chat with users.
Tools- Flutter, Firebase, Dart, VS Code
https://github.com/kanishka-dot/chat_app.git
