## PROJECT

**Smart Safety Mining Helmet** — 2022-2023
Second year university project

The mining helmet being developed for this project is aimed towards coal and gem miners. Managers may monitor where employees who are always wearing our safety helmet are by using it.

Mainly we have used 'ESP now' technology and MQ2, MQ4, MQ7 and IR sensors for this helmet.

**Routez - Road Construction Project** — 2022-2023
Second year university project

By using this application users can report/ inform the road damages. Any kind of road damage/ potholes can be reported via the application.

**Technologies | HTML, CSS, JavaScript, MySQL**
