PROJECTS

- **E-commerce Management System**

This happens on the admin/company side. It should enable adding items to stocks, updating, deleting, searching for items and generate reports on monthly stock, such as to view statistics of the current stock details, available items, unavailable items like wise.

Technology: MongoDB, ExpressJS, ReactJS, NodeJS

Source Code:
https://github.com/wijesekara12/StockManagementSystem.git

- **Sustainable Tourism ERP Solution**

The Sustainable Tourism ERP Solution is a web application developed using the MERN (MongoDB, Express.js, React.js, Node.js) stack. It is designed to address the challenges faced by the tourism industry and enhance the overall tourist experience through data-driven decision-making and sustainability practices.

Technology: MongoDB, ExpressJS, ReactJS, NodeJS

Source Code:
https://github.com/nimilaJay/IT3040_ITPM_GRP_83.git

- **FOODMART - Android Application**

FOODMART is an Android-based mobile application. We look forward to delivering goods to your doorstep as soon as possible.

Technology: Java, Firebase, Android studio

Source Code:
https://github.com/wijesekara12/FOODMART.git

ACHIVEMENTS

Football - Provincial school 2018 nwp 2nd place

Scout - District Commissioner's Award
