## PROFILE

Cloud Operations Engineer with 5+ years of hands-on experience keeping production AWS systems reliable, observable, and performing at scale. Proven track record operating global, customer-facing environments across containerised workloads, CI/CD pipelines, and multi-account AWS infrastructure. Strong background in monitoring, logging, alerting, and incident response - diagnosing issues fast, leading post-incident reviews, and building the tooling and dashboards that prevent recurrence. Comfortable balancing reliability, performance, and cost in regulated production environments with PCI DSS, SOC 2, and ISO 27001 compliance requirements.

## WORK EXPERIENCE

### DevOps Lead Engineer — Sep 2025 – Present

*X-Venture Global Solutions (Pvt) Ltd. · Pannipitiya, Sri Lanka (Remote)*

- Owned operational reliability of production AWS environments including multi-account structures, VPC networking with Transit Gateway, IAM, WAF, AWS Config, and Access Analyzer; enforced security controls and ensured system resilience aligned with AWS Well-Architected best practices.
- Designed and managed CI/CD and release pipelines across GitHub Actions, GitLab, Azure DevOps, and ArgoCD (GitOps); drove pre-deployment validation, risk mitigation, and container image scanning with Trivy to ensure safe, predictable deployments across all environments.
- Built and owned full observability stack using Grafana, CloudWatch, and ELK (Elasticsearch, Logstash, Kibana); designed monitoring dashboards, alerting systems, and centralised logging pipelines to maintain system health visibility and enable fast incident detection across global production environments.
- Managed deployment pipelines and operational reliability of containerised workloads on EKS (Kubernetes) and Docker; ensured resilient, scalable container environments and led troubleshooting of production container incidents.
- Led incident response and post-incident reviews for production issues across cloud infrastructure and containerised workloads; coordinated cross-team remediation, documented root cause analyses, and implemented preventive controls to drive continuous improvement.
- Collaborated with engineering teams to build operability and reliability into system design; conducted regular operational reviews, remediated findings, and contributed to pre-deployment validation and risk mitigation processes.
- Developed operational tooling and automation using AWS Lambda, Step Functions, Python, and Bash to support reliable, repeatable system operations; automated cloud resource lifecycle management and operational tasks to reduce manual toil and improve platform consistency.
- Led FinOps initiatives including right-sizing, Reserved Instance planning, and cost allocation tagging — achieving measurable reductions in monthly AWS spend.
- Communicated system health, incident status, and operational risks clearly to engineering teams and leadership; contributed to longer-term operational strategy and managed identity and endpoint security via Azure Entra ID and Intune.
- Led full AWS region migration (us-east-1 → ap-southeast-1) covering VPC redesign, RDS replication, S3 transfer, API Gateway/Step Functions re-deployment, and Terraform state migration — achieving zero data loss and minimal downtime.

### Senior Cloud Engineer — Jul 2024 – Sep 2025

### Cloud Engineer — Jan 2023 – Jun 2024

*Mad Mobile LK (Pvt) Ltd. · Colombo, Sri Lanka*

- Operated and maintained highly available production AWS services using ECS (Fargate & EC2), Lambda, S3, and RDS; authored infrastructure-as-code in Terraform and took end-to-end operational ownership of the platform environment.
- Designed and managed CI/CD and release pipelines (Jenkins, Bitbucket Pipelines) for containerised application deployments across dev/QA, staging, and production; established deployment standards and release processes to ensure safe, predictable production rollouts.
- Applied AWS networking best practices including VPC design, security groups, NACLs, and Route 53 DNS management for production workloads.
- Implemented AWS SSO migration to Microsoft Azure Entra ID with OAuth2 for Jenkins, strengthening identity governance and centralised account access.
- Monitored system health, performance, and availability using Nagios, CloudWatch, and Graylog; built alerting and logging systems to maintain production visibility and enable fast incident response, supported by Wiz, Qualys, GuardDuty, and WAF for security posture.

- Managed relational and NoSQL databases (AWS RDS MySQL/PostgreSQL, MongoDB, CouchDB); led a zero-downtime MySQL 5.7→8.0 upgrade using blue–green deployment and AWS DMS; consolidated RDS and ElastiCache instances across lower environments to reduce infrastructure sprawl and costs.
- Delivered security and compliance in a regulated, data-sensitive environment — collaborating with cybersecurity and internal audit teams on PCI DSS and SOC 2; designed and documented security controls, IAM access frameworks, and audit artefacts uploaded to Vanta to support formal auditor reviews.
- Led FinOps initiatives — ECS capacity optimisation, right-sizing, and Reserved Instance planning — achieving measurable AWS cost reductions.

**Associate Site Reliability Engineer** **Mar 2022 – Dec 2022**

**Intern Site Reliability Engineer** **Sep 2021 – Feb 2022**

*Pearson Lanka (Pvt) Ltd. · Colombo, Sri Lanka*

- Managed AWS infrastructure for web-based learning platforms using Terraform, Jenkins, Chef, and Linux; collaborated with cybersecurity and audit teams on security policy adherence.
- Contributed to the Tutelage platform using ReactJS, Node.js, TypeScript, and AWS CDK for deployment and CI/CD automation.

**Associate / Intern Business Intelligence Engineer** **Jul 2020 – Sep 2021**

*Enso Corporation (Pvt) Ltd. · Wattala, Sri Lanka*

- Developed analytical dashboards and reports using Qlik Sense and QlikView to support data-driven business decisions.

## EDUCATION

**MSc in Information Technology – Cyber Security** **Jul 2022 – Oct 2025**

*Sri Lanka Institute of Information Technology · Malabe, Sri Lanka*

**BSc (Hons) in Information Technology – Data Science** **Feb 2018 – Mar 2022**

*Sri Lanka Institute of Information Technology · Malabe, Sri Lanka*

## PROFESSIONAL CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Oracle Cloud Infrastructure Foundations – Associate

***In Progress / Planned:***

- *AWS Certified Solutions Architect – Professional*

## SKILLS

**AWS Services:** ECS/Fargate · EKS (Kubernetes) · EC2 · Lambda · CloudWatch · S3 · RDS · IAM · API Gateway · VPC · ALB · Route 53 · CloudFront · ECR · ElastiCache · DynamoDB · WAF · GuardDuty · Config · CloudTrail · Systems Manager · SNS · SQS · EventBridge · AWS Backup · Secrets Manager · KMS · Cost Explorer

**IaC & CI/CD:** Terraform · GitHub Actions · GitLab Pipelines · Azure DevOps · Jenkins · Bitbucket Pipelines · ArgoCD

**Containers:** Docker · Kubernetes (EKS)

**Monitoring:** CloudWatch · Grafana · Prometheus · ELK Stack · Graylog · Nagios · Splunk · PagerDuty

**Security & Compliance:** PCI DSS · ISO 27001 · ISO 27018 · SOC 2 · Wiz · Qualys · Vanta · SonarQube

**Scripting & Databases:** Python · Bash · PowerShell · AWS CLI · Azure CLI · MySQL · PostgreSQL · MongoDB · Redis

**Operations & Tooling:** Incident response · Post-incident review · SRE practices · Runbook automation · Cost optimisation · Release management
