- Additional: JQuery, Firebase

Non-Technical skills

- Communication skills
- Teamwork skills
- Leadership skills
- Problem-solving skills

PROJECTS

Spare Parts Management System (GUI Application Development) Source code

- The primary purpose of the application is to mange spare parts.
- Tools & Technologies: C#, .NET, Visual Studio

Currencies Converter (Web Application) Source code

- The primary purpose of the application is to convert currency values based on user input, including the date, source currency, target currency, and the amount in the source currency.
- Tools & Technologies: ReactJs, Node Js, Express Js, MongoDB, Tailwind CSS, Visual Studio Code

PROJECTS (CONTINUED)

AI Chat Bot (Web Application) Source code

- This Next Js chat bot project aims to be a versatile general knowledge companion. Users can ask questions on diverse topics, and the bot provides informative and engaging responses, promoting continuous learning.
- Tools & Technologies: NextJs, Tailwind CSS, Visual Studio Code

Task Manger (Web Application) Source code

- The task manager full stack web app,simplifies task management with features like task creation, viewing, updating, and deletion. It aims to enhance productivity by providing a user-friendly and centralized platform for organizing tasks.
- Tools & Technologies: ReactJs, Node Js, Express Js, MongoDB, Tailwind CSS, Visual Studio Code

CERTIFICATES

- Certificate of Web Development for Beginners 2023

  Open Learning Platform
  (University of Moratuwa)

- Certificate of Web Development 2023

  Open Learning Platform
  (Udemy)

- Certificate of SQL Tutorial 2024

  Open Learning Platform
  (Udemy)

LANGUAGES

- English

  (Professional working proficiency)

- Sinhalese

  (Native)
