## Artificial Intelligence & Data Science Undergraduate

[redacted]
[redacted]
[redacted]
[redacted]
[redacted]

## SUMMARY

A highly motivated and independent undergraduate with strong skills in AI, data science, and programming. Known for excellent interpersonal abilities and practical problem-solving. Seeking a technology role to gain hands-on experience, enhance skills, and contribute to innovative projects. Committed to driving technological advancements and delivering impactful solutions.

## EDUCATION

### Artificial Intelligence & Data Science

[redacted]

01/2023 - Present [redacted]

- Developed proficiency in designing and implementing software using **object-oriented principles** to create modular and maintainable code.
- Gained comprehensive knowledge in **AI concepts** with hands-on experience in developing intelligent systems.
- Acquired skills in **model evaluation**, **feature engineering** and **implementing algorithms** like regression, classification, clustering.
- Learned to create and analyze **mathematical models** to simulate real-world systems, improving decision-making and forecasting through various simulation techniques.
- Developed expertise in designing, building, and managing **data pipelines and architectures**, ensuring efficient data flow and processing for analytics and machine learning applications.
- Enhanced understanding of **mathematical concepts** which are crucial for developing and optimizing data science algorithms.
- Mastered fundamental **data structures and algorithms**, focusing on their application in solving complex AI problems efficiently.
- Learned to design, implement, and manage databases, ensuring data integrity, security, and efficient retrieval through **SQL** and other **database management systems**.
- Built a solid foundation in programming, covering syntax, control structures, data types, and debugging, with hands-on experience in **Python** and **Java**.

### G.C.E Advance Level

[redacted]

2013 - 2020 [redacted]

- Developed a strong foundation in calculus, algebra, geometry, and statistics, enhancing analytical and problem-solving skills essential for higher studies in engineering and science.
- Gained a deep understanding of fundamental principles including mechanics, thermodynamics, electromagnetism, and quantum physics, through theoretical study and practical experiments.
- Acquired comprehensive knowledge of chemical principles, reactions, and laboratory techniques, with a focus on organic, inorganic, and physical chemistry, aiding in the understanding of material properties and processes.
- Improved proficiency in English language skills, including reading, writing, listening, and speaking, which are crucial for effective communication in both academic and professional settings.

## TECH STACK

### Programming Languages

Python | Java | R | JavaScript | Swift | SQL

### Others

OOP | Git | AWS | Azure | Spark | scikit-learn | TensorFlow | PowerBI

## KEY ACCOMPLISHMENTS

**Achieved Gold Star Award in Cub Scouting**

Special competence in number of specified skills.

**1st runner-up in All island Art competition in 2007**

Dedication and creativity in the field of Art.

## STRENGTHS

**Creativity**

Generating innovative ideas and finding unique solutions for complex problems.

**Positive Thinking**

I led a team to successfully finish a project by fostering a positive mindset.

**Hard-working**

Working on several projects simultaneously while doing extra-curricular activities.

**Solving complex problems**

My IT education has equipped me to work on projects that effectively solve problems.

## LANGUAGES

**English**
Proficient

**Sinhala**
Native

## PROJECTS

### Fitness Guardian - posture correction mobile app

08/2023 - 04/2024

github.com

Developed a mobile app using **Flutter** and **Flask**, integrating machine learning models to correct posture, recommend personalized diet plans, and suggest exercises. Led a team to create an intuitive user interface and robust backend functionality, aimed at promoting health and wellness through technology.

### HCHO Monitoring in Sri Lanka

02/2024 - 04/2024

github.com

Experienced in **Data Engineering** , specializing in analyzing Formaldehyde (HCHO) gas data for environmental research. Proficient in **ETL processes**, **ML model development** and **AWS** utilization. Used **PowerBI** for visualized reporting.

### Census Income Data Classification

02/2024 - 03/2024

github.com

Implemented **Machine Learning models** for income prediction using **Naïve Bayes** and **Random Forest** algorithms. Demonstrated expertise in **dataset preparation**, **GIT** governance, and report creation.

### School Activity Club Management System (SACMS)

09/2023 - 11/2023

github.com

Implemented Management System using **Java** and **Object-Oriented Programming** principles. Designed and engineered core functionalities including club creation, event scheduling, user registration, and attendance tracking. Utilized **UML diagrams** for system design and conducted testing to ensure seamless functionality.

### John's Cafe Inventory Management System II

06/2023 - 07/2023

github.com

Developed a **JavaFX GUI** for Internet Café project, featuring **CRUD operations** (Create, Read, Update, Delete) for managing item details. Implemented functionality for ensuring user-friendly interaction and adherence to **object-oriented design principles** for robustness.

### John's Cafe Inventory Management System I

03/2023 - 04/2023

github.com

Implemented a **Python**-based command line application, the One Net Cafe Management System, aimed at solving **algorithmic problems** and showcasing adeptness in designing solutions. Leveraged Python for its versatility, utilizing **CLI** and **file handling** to manage inventory efficiently.

## VOLUNTEER EXPERIENCE

### Treasurer

**Leo Club of**

2023 - 2024

### Member

**Science Society**

2018 - 2021

### Member

**Photographic Art Society**

2019 - 2021

### Member

**Football Team**

2012 - 2017

### Member

**Cub Scouting of**

2007 - 2011

## CERTIFICATIONS

**Java Object Oriented Programming**

LinkedIn

**AWS Certified Cloud Practitioner - Cloud Concepts**

LinkedIn

**Power BI Essential Training**

LinkedIn

**Learning Bitbucket**

LinkedIn
