PROJECT PORTFOLIO

Smart Car Parking System
Arduino (IOT)

Airport Management System
Database Project (MySQL)

Shop Management System
Java

RESEARCH EXPERIENCE

Final year Project
This project is about an open-source app to deal with our personal medical problems. MY DOC mobile application comprises with up-to-date information and stands out A.I which gives the insight to address your medical concerns. It uses a data model trained on over 700K Q&As from PubMed, Health Tap, and other health-related websites. I used Java to build an app around it and present it to you like a more thought-out idea.
