## ABOUT ME

"As a third-year undergraduate student with six months of internship experience as a Software Engineer, I have honed my skills in MERN stack development, specializing in React.js for front-end projects and contributing to WordPress projects. Equipped with practical knowledge gained from a QA course at SLIIT, I am actively seeking a Quality Assurance position to further enhance my expertise and contribute to software quality standards in a professional environment."

## WORK EXPERIENCE

**SENSUS HUB PVT LTD**
Boralesgamuwa
Jul 2023 - Present

**Junior Software Engineer (Intern)**

Hands-on intern with MERN stack expertise, focusing on software development, documentation, and testing. Contributed to web-based ERP projects for Sri Lankan businesses and excelled in WordPress development.

## EDUCATION

**SRI LANKA INSTITUTE OF INFORMATION TECHNOLOGY**
Malabe
2025

**Bsc (Hons) in IT specializing in Software Engineering**

I'm currently studying for a BSc (Hons) degree in IT, with a focus on Information Technology. In this program, I've gained in-depth knowledge and skills in software development, database management, networking, and information security. Through critical thinking and problem-solving, I've sharpened my ability to create innovative solutions and tackle complex IT challenges.

## UNIVERSITY PROJECTS

Mar 2023 - May 2023

**Tuition and performance Management System - MERN stack**

As a group project at my university, Our team developed a student management and performance system using the MERN (MongoDB, Express, React, and Node.js) stack. This system allows educational institutions to manage student, teacher and parent records, track student performance, and generate reports based on academic progress. Teachers can manage their exams and release results through the system, while administrators can manage class fees and attendance using QR technology. Below tasks I have done.

- Student Function Including all Crud Operations
- Student Auto Generated Password

Apr 2023 - May 2023

**Tourist Management APP - Kotlin, Firebase**

Successfully completed a Kotlin project involving the creation of a mobile application for tourist management. The app facilitates users in exploring Sri Lanka's top travel destinations and hotels, incorporating seamless registration and login processes for an enhanced user experience

- Implemented splash screen, user register and user login. Also implemented user profile which allows users to manage and maintain their profile details.

Apr 2022 - May 2022

**Library Management System- php, javascript, HTML, CSS**

Project - Library management system
In the Internet and Web Technologies module, we utilized HTML and CSS for the frontend and PHP for the back-end to develop a library management system

Oct 2022 - Nov 2022

**Online Help Desk - Java based**

Project - Online help desk Following the MVC architecture in an OOP project, I developed an online help desk to provide support to students
