Profile Summary

A dedicated software engineering professional with a BSc in Computer Science from the University of Westminster, bringing practical industry experience from a placement at Applova Inc. Skilled in full-stack development with hands-on expertise in Java, Spring Boot, JSP, Bootstrap, Android and MySQL, complemented by experience in version control systems like Git and GitLab CI/CD. Proficient in test automation tools such as Selenium and Appium, and familiar with containerization technologies like Docker.

Experience

hSenid Mobile Solutions (Applova Inc.) | Trainee Software Engineer **2023 – 2024**

- Contributed to end-to-end development of Applova products by working across backend (Spring Boot, Java) and frontend (JSP, Bootstrap, Android), enhancing overall platform functionality.
- Developed and integrated Android features into the Applova Business Manager app, improving usability through barcode scanning, configurable receipt settings, and streamlined customer detail interfaces.
- Designed and maintained automation frameworks for Android app testing using Appium, Selenium, and Cucumber, ensuring consistent and reliable test coverage in CI/CD environments with Docker and GitLab.
- Collaborated closely with cross-functional Agile teams to identify and resolve technical issues, enhancing product stability and supporting on-time feature delivery.

Education

University of Westminster, BSc in Computer Science **2021-2025**

Major: Computer Science | Minor: Artificial Intelligence

Skills & abilities

- Programming Languages: Java, Python, JavaScript,Html,CSS
- Frameworks & Tools: Spring Boot, Flask, Selenium, Appium, Docker, Android
- Databases: MySQL
- Version Control & CI/CD: Git, GitLab CI/CD

- Soft Skills: Agile Methodology, Critical Thinking, Team Collaboration

Projects

Library Management System

Technologies: Java, Spring Boot, JSP, Bootstrap, MySQL

- Developed a comprehensive system for managing book inventory, member records, and transaction tracking.
- Implemented search functionality to quickly locate books and members.
- Utilized Spring Boot for robust and scalable backend architecture.
- Designed a responsive and user-friendly frontend using JSP and Bootstrap.

Applova Business Manager – Android Feature Development (Applova Project)

Technologies : Android SDK, Java, Retrofit, Realm DB

- Developed features for the Business Manager app including receipt settings, customer detail UI tabs, and barcode-based product scanning.
- Integrated RESTful APIs using Retrofit for real-time data sync with Realm local storage.
- Focused on modular Android architecture using fragments, adapters, and tab navigation.

Spring Boot Admin web – Merchant Configuration & Patch Integration (Applova Project)

Technologies: Java, Spring Boot, JSP, MySQL

- Implemented admin panel functionalities such as config toggles for card payments and merchant patch settings.
- Utilized Spring Boot and JSP to build scalable, server-side rendered modules for web admin.

Android Test Automation and CI/CD Integration (Applova Project)

Technologies: Appium, Selenium, Jenkins, Cucumber, Docker, GitLab CI/CD

- Built and maintained hybrid test automation frameworks using Appium for Android application flows.
- Automated testing pipelines using Docker and GitLab CI/CD for continuous testing, reporting, and deployment.
- Authored BDD-style test cases with Cucumber and generated structured reports via Extent Reports.
