SUMMARY

Recent Higher Diploma graduate in Computing and Software Engineering, seeking an IT-related internship to gain hands-on industry experience. Possesses a solid academic foundation in software development and programming, and is preparing to commence degree studies to further strengthen technical expertise. Highly motivated to develop practical skills and contribute effectively to professional development teams.

SKILLS

JavaScript	Bootstrap	C#	FIrebase
TypeScript	Tailwind CSS	ASP .NET Core	Firebase Authentication
Node.js	MySQL	Swagger	Firebase Cloud Firestore
Express.js	SQL Server	Rest API	Android Studio
React	SQLite	PHP	Visual Studio 2022
Git / GitHub	MongoDB	Java	

EDUCATION

Higher Diploma in Computing & Software Engineering **April 2024 - November 2025**
Cardiff Metropolitan University, UK - Awarded through ICBT Campus, Sri Lanka

GCE Advanced Level (Science Stream) - Passed (3S) **January 2022(2023)**
Richmond College, Galle, Sri Lanka

GCE Ordinary Level - Passed (9A) **December 2019**
Ollcott College, Galle, Sri Lanka

PROJECTS

mycontacts-backend **December 2025**

https://github.com/jacob4521/mycontacts-backend.git

Node.js/Express REST API for contact management with MongoDB database, implementing CRUD operations and following MVC design pattern.

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, REST API, MVC Architecture

YouTube Clone Web Application **November 2025**

https://github.com/jacob4521/youtube-clone.git

Developed a responsive YouTube clone using React.js, React Router, and Vite. Features include video feed browsing, video playback interface, dynamic navigation, and recommended videos section. Implemented component-based architecture for scalable UI development.

Tech Stack: React.js, React Router, Vite, Moment.js, CSS3

Netflix Clone (Watch movie trailers) **October 2025**

https://github.com/jacob4521/Netflix_Clone.git

A responsive movie trailer streaming platform built with React.js and Vite, featuring Firebase authentication for secure user login/signup, dynamic content displays, and an intuitive video player. Users can browse movies and watch trailers in a Netflix-inspired interface.

Tech Stack: React.js, Vite,Firebase (Auth & Firestore), React Router, CSS3, TMDB API

National Digital Management System (NDMS) – Final Year Project **August 2024**

https://github.com/jacob4521/NDMS-1.0.git

National Digital Management System (NDMS 1.0)
A full-stack web application built with PHP and MySQL featuring role-based authentication, citizen registration with QR code generation, vaccination tracking, career guidance system, birth certificate generation, and comprehensive admin dashboard for managing national records.

Technologies & Tools Used:

Backend: PHP, MySQL Database, MySQLi Extension, Session Management & Authentication

Frontend: HTML5, CSS3 (Custom Styling, Responsive Design), JavaScript (ES6+), Font Awesome 6.0.0 (Icons)

Libraries & Components: PHP QR Code Library (QR Code Generation), Fetch API (Asynchronous Data Handling)

FittZone Fitness Center Management System **April 2024**

https://github.com/jacob4521/FitZone-Fitness-Center.git

A full-stack web application for managing fitness center operations with role-based access for admins, staff, and members. Features include appointment booking, membership management, blog system, trainer management, and customer inquiry handling. Built with PHP, MySQL, and responsive CSS.

Technologies & Tools Used:

Languages: PHP, JavaScript, HTML5, CSS3 **Database**: MySQL

PERSONAL SKILLS

- Troubleshooting & Solving
- AI-Assisted Development (using tools to improve coding efficiency, debugging, and learning)
- Leadership Skills
- Fast Learner with Strong Adaptability
- Team collaboration & Communication
- Time Management & Task Prioritization
- Critical Thinking & Analytical Skills
- Good Communication, Planning and Negotiation Skills

LANGUAGES

- English (Fluent)
- Sinhala (Fluent)
- Tamil (Fluent)
